PROFESSIONAL SUMMARY

Cybersecurity Engineer with hands-on experience across SOC operations, live production penetration testing, and independent bug bounty research. Delivered an 18-finding black-box pentest on a production web application with all 18 vulnerabilities remediated, and an officially credited open-source contributor on the Kali NetHunter project.

EXPERIENCE

Electrosoft Systems, Cybersecurity Intern Jalgaon (Onsite)

- Performed authorized two-phase black-box web application penetration test on a live production target (scaips.in ) under MSBTE industrial training
- Identified 18 vulnerabilities including unauthenticated PII exposure, broken access control, and CSP weaknesses
- Achieved 18/18 findings remediated within 48 hours post-retest; delivered full professional report with CVSS ratings and PoC evidence
- Adapted testing methodology mid-engagement to bypass JWT v3 device fingerprinting control

Zerodha Bug Bounty Program, Independent Security Researcher Remote

- Conducted authorized vulnerability research across Zerodha's in-scope production assets (Sensibull, Smallcase, Streak, FD, Varsity Live) under their public bug bounty program
- Performed manual reconnaissance and testing to identify exploitable vulnerabilities, submitting findings with mandatory video proof-of-concept per program requirements
- Authored original, hands-tested vulnerability reports in compliance with program guidelines prohibiting AI-generated submissions

EDUCATION

Diploma in Computer Engineering, Vasantrao More Polytechnic, Tehu 06/2025 – Present | Parola, MH

TECHNICAL SKILLS

Security Assessment: Penetration Testing Vulnerability Scanning (Burp Suite, Metasploit, Nikto) OWASP Top 10.

Network Security: TCP/IP DNS DHCP VLANs Firewalls Packet Analysis (Wireshark) Log Analysis.

Operating Systems: Linux (Kali, Ubuntu, Bash Scripting) Android Security (Rooting, Custom ROMs, NetHunter) Windows.

PROJECTS

Kali NetHunter Contributor, Open Source Project 01/2024 – Present

- Officially credited contributor on the Kali NetHunter kernel registry and Kali Linux official downloads page; developed a LineageOS 4.9 kernel for the Xiaomi Redmi Note 4X (mido) with HID, packet injection, and multi-chipset wireless driver support (RTL88XAU, RTL8188EUS, MT7901U)

Home Security Lab, Independent Research

- Architected a virtualized home lab to simulate attack vectors and test defense mechanisms (Firewalls, IDS/IPS).
